

Hamza Nadeem Khan

Full Stack Developer

Bury, Manchester, UK • hamza.dev2024@gmail.com • +44 7884 529734 • [LinkedIn](#) • hamzanadeem.vercel.app • [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of commercial experience building high-performance, scalable web applications using React.js, Next.js, Node.js, TypeScript, and cloud technologies. Proven track record of reducing page load times by up to 35%, cutting deployment cycles by 70%, and driving user engagement growth across fintech, SaaS, and enterprise platforms. Skilled in microservices architecture, CI/CD pipelines, containerisation (Docker, Kubernetes), and Agile delivery. Currently based in Manchester, UK.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, React Native, Redux, TypeScript, JavaScript, Tailwind CSS, Material UI, SCSS	Backend:	Node.js, Express.js, Nest.js, RESTful APIs, WebSockets, Stripe, PayPal
Databases:	MongoDB, MySQL, PostgreSQL, Redis, Sequelize, SQLite	DevOps & Cloud:	AWS (S3, Lambda, EC2, CloudFront, MediaLive), Docker, Kubernetes, CI/CD, GitHub Actions
Testing:	Jest, Cypress, Selenium, Mocha, ESLint	Tools & Methods:	Git, Agile/Scrum, JIRA, Figma, Slack, Microsoft Teams

PROFESSIONAL EXPERIENCE

Full Stack Developer — Hulee Ltd. Aug 2025 – Present
Manchester, UK

- Core developer on **Orta (orta.co.uk)** — a workforce management SaaS platform handling onboarding, compliance tracking, rota planning, and shift management for care services and hospitality industries.
- Architected and implemented a **global error handler with centralised logging and Sentry integration** across the entire backend, drastically reducing mean time to detection and improving incident response.
- Built secure workflows including **CSV bulk staff upload, CSRF protection**, and precision timestamp tracking for automated timesheet calculations and GPS clock-in features.
- Designed RESTful APIs for **compliance dashboards** with automatic expiry alerts (90/60/30 days), DBS tracking, and document management — supporting CQC regulatory requirements.
- Built comprehensive **CI/CD pipelines** with Jest and GitHub Actions, reducing regression incidents by **40%** and enabling continuous deployment.

Senior Full Stack Developer — Tekvill Solutions Nov 2024 – Jun 2025
Hybrid

- Built and optimised scalable **microservices** using Node.js, Express, MongoDB, and Kubernetes, improving deployment efficiency and system uptime to **99.9%**.
- Developed responsive SPAs using **React.js** with server-side rendering, cutting page load times by up to **35%** and boosting user engagement.
- Designed and implemented **event-driven architecture** using WebSockets for real-time notifications, live dashboards, and collaborative features across SaaS platforms.
- Led **API gateway design** and third-party integrations (payment processing, geolocation services), ensuring seamless interoperability across platforms.
- Drove Agile development through effective sprint planning and stakeholder collaboration, accelerating delivery and improving team output by **35%**.

Full Stack Developer — Innovage.io Apr 2023 – Nov 2024
Lahore, Pakistan (Remote)

- Developed dynamic UIs with **React.js and Next.js** using Context API and reusable component patterns, increasing user engagement by **40%**.

- Built and optimised a **microservices backend** using Node.js (Express), TypeScript, Docker, and MySQL, enhancing type safety and query performance by **35%**.
- Integrated **AWS services** (S3 for storage, Lambda for serverless computing, EC2 for scalable infrastructure) to power a high-availability procurement platform.
- Created **CI/CD pipelines** with GitHub Actions and comprehensive testing (Jest, Selenium, Mocha), reducing bugs by **50%** and deployment times by **70%**.
- Led Agile sprint teams, aligning front-end and back-end efforts, achieving **15% faster** delivery timelines.

KEY PROJECTS

Orta — Workforce Management SaaS: Full-stack platform for onboarding, compliance tracking, rota planning, and shift management. Built with MERN stack featuring GPS clock-in, DBS tracking, and CQC-compliant reporting.

Vice Forex — Real-Time Trading Platform: Full-stack trading system with WebSocket-based real-time market data, ProRealTime API integration, and modular TypeScript architecture for low-latency operations.

Sports Streaming Platform — Live Video Infrastructure: Built using AWS MediaLive, S3, CloudFront with Next.js + TypeScript frontend, admin dashboards, and role-based access control.

My Home Pathway — Fintech Mortgage App: Led React-based front-end development, integrated Plaid for secure financial data access, improved onboarding and mobile engagement by 35%.

Zero Swipe — Job Search Platform: Cross-platform React Native app with Tinder-style swipe job matching, real-time chat, and secure payment integration for UK job market.

EDUCATION

BSc Computer Science — COMSATS University Islamabad | 2019 – 2023
