

Hamza Nadeem Khan

Software Engineer

Bury, Manchester, United Kingdom | hamza.dev2024@gmail.com | +44 7884529734 |
<https://hamzanadeem.vercel.app/>

Full Stack Developer with over 3 years of expertise in building high-performance, scalable applications using React.js, Node.js, TypeScript, and Tailwind CSS. Adept at crafting cloud-based solutions, optimizing performance, and designing microservices architectures. Committed to delivering innovative solutions while fostering collaboration and driving success within cross-functional teams.

Projects

Vice Forex – Real-Time Trading Platform

- Built a full-stack trading system with WebSocket-based real-time market data and secure financial transactions.
- Integrated ProRealTime API and developed a modular TypeScript architecture for scalable, low-latency trading operations.

My Home Pathway – Fintech Mortgage App

- Led front-end development of a React-based mortgage platform, improving onboarding and mobile engagement by 35%.
- Integrated Plaid for secure financial data access and built event tracking systems for user behavior analytics.

Ex Squares – Enterprise Procurement System

- Developed a MERN stack web app supporting 100K+ daily transactions with AWS-powered scalability.
- Improved backend performance by 35%, reducing processing time and enhancing system reliability.

Sports Streaming Platform – Live Video Infrastructure

- Built a live sports streaming platform using AWS MediaLive, S3, and CloudFront for secure, low-latency broadcasting and recording.
- Developed a Next.js + TypeScript frontend with admin dashboards, role-based access, stream monitoring, and QR-based court access.

Answer Campus – Academic Assistance Platform

- Led front-end development using Next.js and Material-UI, improving user engagement by 20%.
- Built an optimized interface for streamlined academic content access and integrated GitHub Actions for CI/CD.

Zero Swipe – Job Search Platform

- Developed a cross-platform React Native application targeting UK users with two roles: employer and job seeker. Developed a cross-platform React Native application targeting UK users with two roles: employer and job seeker.
- Implemented Tinder-style swipe gestures for job matching, integrated real-time chat, and enabled secure payment functionality.

Professional Journey

Full Stack Developer | *Innovage.io* | April 2023- Nov 2024

- Developed dynamic UIs with React.js and Next.js using Context API and reusable patterns, increasing user engagement by 40%.
- Built and optimized a microservices backend using Node.js (Express), TypeScript, Docker, and MySQL enhancing deployment, type safety, and query performance by 35%.
- Improved performance with lazy loading, error boundaries, and efficient API design, cutting render and load times by up to 25%.
- Led Agile teams aligning front-end and back-end efforts, achieving 15% faster delivery timelines.
- Created CI/CD pipelines with GitHub Actions and implemented comprehensive testing (Jest, Selenium, Mocha), reducing bugs by 50% and deployment times by 70%.

Senior Full Stack Developer | Tekvill Solutions | Nov 2024- June 2025

- Built and optimized scalable microservices using Node.js, Express, MongoDB, and Kubernetes, improving deployment efficiency and system performance.
- Developed responsive, high-performance UIs and SPAs using React.js, cutting load times by up to 35% and boosting engagement.
- Leveraged TDD with Jest and Cypress, increasing code reliability and reducing bugs by 15%.
- Delivered SaaS platforms with the MERN stack, integrating real-time updates (WebSockets) and third-party APIs for enhanced UX and business functionality.

- Drove Agile-based development with effective sprint planning and stakeholder collaboration, accelerating delivery and improving team output by 35%.
- Promoted best practices and documentation, improving team knowledge-sharing efficiency by 25%.

Full Stack Developer | Hulee Ltd. | Aug 2025 – present

- Designed, developed, and optimized scalable web application using React.js, Node.js, Express, and MongoDB, ensuring robust performance and maintainability.
- Implemented secure and efficient workflows by integrating features like bulk staff upload via CSV, CSRF protection, and accurate timestamp tracking for timesheet calculations.
- Improved system reliability by creating unit tests and CI/CD pipelines using Jest and GitHub Actions, ensuring automated quality checks and preventing future regressions.
- Collaborated cross functionally with product and design teams to deliver high-quality, user-centric solutions aligned with business requirements.
- Enhanced codebase efficiency and maintainability through optimization, documentation, and adoption of best development practices.

Technical Expertise

- **Front-end Development:** React.js, Next.js, Redux, React Native, JavaScript/TypeScript, Tailwind CSS, Material UI, SCSS.
- **Back-end Development:** Node.js, Express.js, Nest.js, NPM, RESTful APIs, Payment methods (Stripe, PayPal, 2Checkout), User Authentication
- **Database Management:** Sequelize, MySQL, PostgreSQL, Redis, NoSQL (CouchDB, Cassandra), MongoDB, SQLite
- **DevOps:** CI/CD, Docker, Kubernetes, AWS, Git
- **Project Management:** Agile Development, JIRA, DevRev, Slack, Microsoft Teams
- **Testing:** Cypress, Jest, Selenium, ESLint, Troubleshooting
- **Soft Skills:** Disciplined, Well-Organized, Collaboration, Teamwork, Independent Work, Agile

Education

COMSATS Institute of Information and Technology | Bachelor's of Computer Science

Certifications

- IBM Full-Stack JavaScript Developer – **IBM**
- Application Development using Microservices and Serverless – **IBM**
- Get Started with Cloud Native, DevOps, Agile, and NoSQL – **IBM**

- Introduction to Containers with Docker, Kubernetes & OpenShift – **IBM**
- AWS Cloud Technical Essentials – **AWS**
